KSOU objective is providing access to high quality education to all those who seek it, irrespective of age, region or formal qualifications. Karnataka State Open University is truly an organization of academic excellence.

About Your Career

Growth of the Internet and the expansion of the World Wide Web have generated a variety of occupations relating to the design, development and maintenance of Web sites and their servers.

Web pages are every where. Today small businesses to big enterprises run their business through internet websites. Internet is every where. There are already millions of web sites and billions of web pages. As internet usage has increased dramatically, there is a huge demand for web designers.

Lucrative employment opportunities are available for web designers. Thanks to the Internet, many web designers can now work from home on a freelance basis also.

Professionals in dotcoms design web pages, or take up a technical job on the server side. Websites of education, businesses, services, institutions, organisations, agencies provide ready options for work. They operate for the consumer on one end and B2B on the other.

Jobs in Dot coms are at the Front end involving page layout design, information architecture - skills learnt through HTML, CSS, Photoshop, Dreamweaver, Flash, Fireworks, graphic packages, Java scripts etc. Database Design or managing the back end network administration involves feeding of the servers, backups, server security etc. Database administration involves drawing upon the database and sending them back to the user people. Network Experts, Information Architects, Website / Database Integrators , Software engineers, Information Brokers/Infomediaries, Web Designers, Web Masters, E- Commerce Experts, Web marketeers, Content Providers work in Dot Com companies.

Nature of Work :

Web designer

Web designers use creative graphic designs to make the portal attractive and user friendly.

A good layout designing, colors, typography and fonts are required for a good web designer. You also need to know how to work in different graphics and Web publishing tools. It's good to know Java and HTML so it becomes easier to coordinate with the team. You have to be a good team player.

Web marketing executive

A lot of dot coms are looking for those with an MBA degree. You could also be a graduate with marketing experience and working knowledge of the Internet. Any other technical knowledge like programming on graphics is an advantage - it becomes easier for you to coordinate between the client and your team. You need to be passionate about technology and have the knowledge about the industry your Website is focused on.

E- Commerce

Electronic commerce has evolved with the convergence of computers and telecommunication technologies. E-commerce has generated an Internet economy activating world wide marketing and banking activities. The professionals working for this are 'Infomediaries'. Infomediaries are trained to use virtual skills to turn data into usable information via a community based buying environment or powerful technology based buying aids. Internet jobs in e-commerce are information based and involve consumer/buyer information and services, developing and managing seller 'Web-Portals', creation of Internet market, virtual customer management, consulting, etc. Network economy has generated opportunities in knowledge management, software programming on the Internet, central banking and the like.

E-Finance

Financial business done this way is faster and more effective. With stock exchanges going online and enabling investors and players to trade directly, the movement of finance from one nation to another and one pocket to the other is done at the click of a mouse.

Any kind of monetary transaction processed electronically is referred to as e-finance. These may be transactions done online through the Internet, e-mail, intranet or sub mediums like stock exchanges and business house. E-finance has been there for a long time. But it has gained relevance due to its presence being felt at the consumer's end with the growth of e-commerce.

M-Commerce

Third generation mobile telephony will allow the mobile user to access the World Wide Web or its components like the traditional user with a personal computer. Mobile e-commerce are high speed networks, WAP-wireless application protocol, dual-slot mobile phones and user-friendly interfaces, which render connectivity and facilitate shopping on the move. The benefits of these emerging technologies are the facility to sell or buy on the web while on the move. Internet retailers provide accessibility of their sites by mobile devices. WAP and XML technology will facilitate the convertibility of the existing site content to make it 'mobile-ready'.

WAP

Wireless Application Protocol is a specification for a set of communication protocols to standardize the way WAP embedded digital cell phones and radio transceivers can be used for Internet access. WAP has become the most desired technology in e-commerce across the globe forming the very foundation for mobile commerce.

Frequently Asked Questions

Is Certificate in Web Designing a regular program or a distance education program ?

A : Certificate in Web Designing is a full time regular program. Web Designing courses can't be taught through distance education. You will get a regular certification from KSOU.

Why KSOU is called open university ?

A : Each university has a zone/region restriction to open college. For example Mysore University can only open colleges with in its zone (Mysore/Hassan/Mandya). Open University allows colleges to open outside its zone/region. KSOU is a Mysore University's wing which allows to open colleges outside its zone.

Can a certification in Web Designing provide me with a good career option ?

A: YES. As IT sector is a booming industry especially in developing countries such as India. Knowledge and skills in this area provides a greater careers and also a secured future.

There are already thousands of web design and graphic design companies in India.

Is this certification helps me for higher studies and jobs in foreign countries ?

A : YES. Absolutely. KSOU certification is recognized all over the world. KSOU is recognized by Permanent member of Association of Commonwealth Universities (ACU) London UK, Asian Association of Open Universities (AAOU), Beijing, China, and also has association with Commonwealth of Learning (COL).

This would help in getting visa/higher studies/jobs in foreign countries.
